

Smart Wi-Fi switch WiFi Sonoff Dual R3 Lite

Smart Wi-Fi switch WiFi Sonoff Dual R3 Lite

Ref: 6920075776966

Sonoff Dual R3 Lite intelligent switch

Conveniently control lighting or automatic blinds. The Sonoff Dual R3 Lite smart switch gives you 2-way control of selected devices and allows you to create work schedules via the app. It is also compatible with Amazon Alexa and Google Home voice assistants. It also works with other Sonoff products like the L2 LED strip, for example, and is extremely durable.

Many uses

The switch can serve as an intelligent control module for a 100-240V AC motor. This makes it ideal for operating, among others, automatic curtains, electric roller blinds, awnings, garage doors or even an electric barbecue. You can also successfully use it to control lighting.

Schedule your work

Customize switch connected devices to fit your daily schedule. The product allows you to create detailed work schedules. Do you want the first rays of the sun to wake you up in the morning? Set the roller blind to rise automatically at a specific time. You can even adjust the percentage of curtains that open!

Remote control

Before you left home, you didn't close your outdoor blinds and it just started raining? No problem - just reach for your phone! The application allows you to remotely control devices connected to the switch. With just a few clicks you can start them, turn them off or adjust the parameters.

Get a unique atmosphere

The Dual R3 Lite switch is also compatible with other Sonoff products. For example, you can create an intelligent scene, which, when activated, will draw the blinds, switch on the L2 LED strip and change the color of the lighting. In this way, you can quickly change the atmosphere in the room!

Voice control

No longer do you have to reach for your phone every time or move from your seat to operate your devices. The Switch is compatible with Amazon Alexa and Google Assistant, which means you can control it with your voice. With a simple command, you can close the blinds or turn on the lights!

2-way control

Do you want to be able to control the lighting with a switch not only on the first floor, but also on the first floor? No problem! Dual R3 Lite supports 2-way control, so you're free to use the devices of your choice. Turn the light on when you want to climb the stairs and off when you're at the top. No more having to navigate in the dark!

Brand

Sonoff

Model

Dual R3 Lite

Wi-Fi
