

ZigBee Heiman HS2SA-1 Tuya optical smoke detector

Ref: 5906168433412

ZigBee Heiman HS2SA-1 Tuya optical smoke detector

ZigBee Heiman HS2SA-1 Optical Smoke Detector Tuya

The Heiman HS2SA-1 smoke detector uses an infrared photoelectric sensor to detect smoke. Powered by a CR123A/CR17335 battery, it offers long life and very low power consumption. The device is Zigbee-compatible, providing a signal range of up to 100 meters in open space, guaranteeing a stable connection and fast notifications.

Reliable detection and alerting

The Heiman HS2SA-1 detects even small amounts of smoke, caused, for example, by a cigarette butt, failure of electrical equipment or installation. When the detected smoke reaches a certain level, the sensor triggers an audible alarm with a volume of about 85 dB at a distance of 3 meters, as well as a light alarm with a rapidly flashing red LED indicator. This immediately alerts the user and his family to the danger, allowing them to react quickly.

Smart features and remote control

The Heiman HS2SA-1 smoke detector offers advanced smart features, such as remote control from a smartphone via the Tuya app (Smart Life) When smoke is detected, alarm messages are sent to the user's app in real time, allowing the user to monitor the status of the detector and take immediate action, regardless of location. In addition, the sensor is equipped with a mode to silence unwanted alarms, and a low battery warning function.

Durability and resistance

The sensor's housing was created from fire-resistant ABS material, which provides additional safety and durability. The sensor is designed to be mounted on a wall or ceiling, and its compact 86 × 34.5 mm dimensions make it easy to mount in a variety of locations. Heiman HS2SA-1 will work well in homes, banks, stores, offices, hotels, etc.

Convenience of use

Heiman HS2SA-1 is a device that combines advanced technology with convenience of use. Thanks to its low power consumption and replaceable battery, the sensor provides long operating time without the need for frequent battery changes. In turn, the remote control and real-time monitoring functions add to the convenience of use, allowing full control over the security of your home or workplace.

Manufacturer Heiman Model HS2SA-1 Operating voltage DC 3V Power supply x1 CR123A/ CR17335 Sensor type Infrared photoelectric Alarms sound and light Alarm volume approx. 85 dB / 3 m Network Zigbee Signal range approx. 100 m (open space) Operating temperature 0°C ~ +55°C Operating humidity approx. 95%RH (non-condensing) Dimensions 86 × 34.5 mm Mounting location wall, ceiling
