ZigBee Heiman HS1EB smart emergency button

ZigBee Heiman HS1EB Tuya smart alarm button

The Heiman HS1EB smart alarm button is a reliable device designed to send an alarm signal in emergency situations. It has a compact and stylish design and uses Zigbee technology with extremely low power consumption for long battery life. It is ideal for use in homes, offices, stores, hospitals, banks and guard posts.
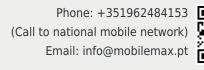

Simple operation

The product features a maximally simplified design for comfort and ease of use. In an emergency situation, all you have to do is press a button to send an alarm signal, making it ideal as a safety device in case of emergencies for the elderly or children.

Standard Zigbee protocol

The button uses the standard Zigbee protocol, which ensures its wide compatibility with various network devices. This means you can easily integrate it into your existing smart home systems and devices.

Remote emergency notification

The device allows you to remotely notify emergency situations via a mobile app. This allows you to instantly receive information about an alarm no matter where you are, enhancing security and allowing you to respond quickly.

Smart linkage function

The Heiman HS1EB has a smart linkage function that allows you to integrate the button with other home automation devices. You can set it to send an alarm signal to your family or neighbors if the button is pressed, increasing local security.

Low power consumption

The device is designed for minimal power consumption, allowing for long battery life. As a result, you don't have to worry about replacing batteries frequently, increasing the convenience and reliability of the device. What's more, it is equipped with a low battery indicator that lets you know when the battery needs to be replaced. This allows you to ensure continuous operation of the device without worrying about unexpected shutdown.
