

360° Outdoor Camera IMOU Cruiser 2MP PoE

360° Outdoor Camera IMOU Cruiser 2MP PoE

Ref: 6971927231607

IMOU Cruiser 2MP PoE rotating outdoor camera

IMOU Cruiser 2MP PoE is a rotating outdoor camera that provides comprehensive monitoring and advanced security features. It captures high-quality 2MP video and can intelligently detect and track motion. It also has a built-in siren, microphone and speaker. It is also distinguished by its IP66 waterproof rating.

High-resolution image

The camera provides 2MP (1920x1080) resolution, allowing it to capture detailed and clear images. Now you won't miss a single detail! What's more, the device allows you to record color video even at night and offers up to 16x digital zoom. It can also pan and tilt, covering every nook and cranny of your property.

Automatic detection and tracking

The camera intelligently detects motion and people, plus it allows automatic tracking. If someone comes within its range, you'll get an alert on your phone right away! The device also has a built-in siren with a volume level of 110 dB, which will help you effectively scare off possible burglars.

Facilitates communication

The built-in microphone and speaker allow two-way communication through the camera. This allows you, for example, to conveniently call the children for dinner, tell the courier where to leave a package, greet unannounced guests or say something important to household members.

Refined in every detail

Thanks to its IP66 rating, the camera is ideal for outdoor use - even harsh weather conditions, such as rain or wind, will not frighten it. The robust plastic housing ensures its durability and reliability, while the Wi-Fi connection and two antennas guarantee a strong, stable signal. With IMOU, you can avoid wiring or configuration problems!

Imou Life app

The Imou Life app allows you to conveniently manage your camera and monitor your home from anywhere. This gives you greater peace of mind and security. Using it, you can, for example, check the live view, as well as watch and save selected recordings. You will also receive real-time notifications.

Several file storage options

The camera allows you to store recordings in several ways. It supports microSD memory cards of up to 256 GB and works with Onvif-compatible NVRs. All new users can also use the cloud for a free 30-day trial period.
