IMOU Cube 4MP WiFi indoor camera

IMOU Cube is an indoor surveillance camera that provides clear images and advanced detection features. It records video in 4MP resolution and effectively detects motion - when someone comes within its range, you'll know right away with notifications to your phone. The device also supports two-way communication and is compatible with microSD cards of up to 256GB.

Exceptional image quality

The Cube camera offers 4MP (2560x1440) resolution, allowing it to capture detailed and clear images around the clock - both day and night. So you can be sure that your home, store or office has reliable protection - nothing will escape your attention.

Intelligent detection

Thanks to advanced PIR detection, the camera automatically sends alerts when motion is detected. So you can keep your hand on the pulse and react immediately in alarming situations. The device also detects unusual sounds, such as a baby crying, giving you full control over what's going on in your home.

Two-way Communication

The built-in microphone and speaker enable two-way communication, allowing you to communicate directly with household members or

guests. This makes it easy for you to relay a message to a courier, greet friends who have come to visit you, or call a child for dinner.

Possibility to connect an alarm

The camera is equipped with an additional input/output interface that allows you to connect detectors, sensors, alarms and other devices to it. This allows you to integrate it with your existing alarm system to increase the effectiveness of monitoring and provide better protection for your home or office.

Flexible storage options

The camera supports microSD cards of up to 256GB, allowing you to store recordings locally. In addition, the device is compatible with NVRs that support the Onvif protocol. New users also get free 30-day cloud access. It's also worth opting for Imou Protect's paid subscription service, which not only allows convenient file storage, but also provides more advanced AI features and more.
