TWS HiFuture OlymBuds 3 in-ear headphones (white)

OlymBuds3 headphones are ideal for music lovers who appreciate comfort and sound quality. With advanced features and an ergonomic design, OlymBuds3 provide comfortable wearing and an impressive sound experience. In addition, voice assistant support makes it easy to use.

Comfort and lightweight

OlymBuds3 are extremely lightweight, making them easy to take with you almost anywhere. Travel to work, college - take your favorite music with you wherever you want. What's more, their ergonomic design guarantees comfortable use even when worn for long periods of time, without worrying about discomfort.

Impressive sound

The headphones are equipped with 6mm drivers that deliver powerful and impressive sound. The emphasized low tones make each recording sound deeper and more dynamic, allowing you to enjoy the full spectrum of sounds.

Long playback time

The OlymBuds3 offer up to 25 hours of playback, making them perfect for travel or long work days. The charging time of about 1 hour, on

the other hand, allows you to quickly get the headphones ready for use again.

Bluetooth 5.3

OlymBuds3's built-in Bluetooth 5.3 allows the headphones to pair instantly with your device, ensuring a stable and reliable connection. The technology allows for seamless audio transmission, providing clear and crisp sound.

Intuitive controls

The headphones feature touch panels that allow you to easily manage music playback and answer and reject incoming calls. Support for Google Assistant and Siri voice assistants allows you to use additional features with simple voice commands.
