McDodo CH-4153 33W mains charger (purple)

The McDodo CH-4153 network charger supports multiple fast charging protocols, and has a charging power of 33W. It is equipped with a USB-A and USB-C port, which allows two devices to renew energy at the same time. With a universal voltage of 100-240V, you can easily use it almost anywhere in the world, and the multi-level protection will ensure the safety of use.

Fast charging of your devices

Już nie musisz czekać wiele godzin na to, aż Twój smartfon będzie gotowy do pracy! Ładowarka obsługuje wiele standardów szybkiego ładowania, among others. PD3.0, QC3.0, FCP czy AFC, a jej maksymalna moc sięga 33 W. To wszystko sprawia, że w zaledwie 30 minut naładujesz iPhone'a 14 do 60%!

2 USB ports for greater efficiency

Now you only need one charger to charge multiple devices! The CH-4153 offers 2 charging ports - USB-A and USB-C, so you can successfully renew the energy of two devices at the same time. You also don't have to worry about compatibility issues. The charger works with multiple devices, so you can use it to charge your phone, tablet, laptop, wireless headphones or even your Nintendo Switch console.

Innovative GaN technology

The McDodo charger has been developed using innovative GaN, or gallium nitride, technology. It allows the charger to charge your phone, laptop and other gadgets much faster than traditional chargers. GaN also makes the charger smaller and lighter, so you can easily take it with you on business trips or vacations.

No worries about safety

Charge your equipment without worrying about damaging it. The charger is equipped with 8-level protection, which reliably protects against short circuits, excessive power, overcurrent or overvoltage, among other things. An intelligent system continuously monitors the temperature during charging, effectively preventing overheating. What's more, the charger automatically slows down the charging process when the battery reaches 80% charge, helping to prolong its life.
