360° Indoor WiFi Camera Botslab 2 Pro C221 5MP 5G

Ref: 6974772421483

360° Indoor WiFi Camera Botslab 2 Pro C221 5MP 5G

Botslab 2 Pro C221 5MP 5G rotating WiFi indoor camera.

Protect your home with the Botslab C221. The camera offers exceptional image quality at 5MP (2880 x 1620) resolution. With a 1/2.7" CMOS sensor and a wide F1.6 aperture, the camera captures detailed images even in low light. Equipped with 10 infrared LEDs (940 nm IR LED), it provides clear images in total darkness at distances of up to 10 meters, making it ideal for indoor monitoring both day and night.

Full range of motion and AI functions

The camera uses a wide field of view (109.1°*60.9°*126.7°) and the ability to fully rotate horizontally (351°) and tilt vertically (73°). This provides comprehensive coverage of the entire room. Advanced AI functions enable it to detect people, animals, a baby's cry and the moment of leaving the building, enhancing safety and comfort.

Several monitoring modes

The device offers various monitoring modes so you can customize the camera's operation to suit your needs. Panoramic Patrol covers every angle with smooth rotation, Fixed-Point Patrol focuses on frequently monitored areas, and One-Tap for Panorama allows you to instantly capture a full 360° view.

Stay up-to-date

The camera sends instant notifications to your phone when it detects a disturbing sound or movement. You can customize the notification system to avoid false alarms. What's more, a built-in audible alarm sounds when a potential intruder is detected. In addition, you can schedule the privacy mode or automatically start it when you arrive home, giving you full control over monitoring and privacy. Note: automatic mode is only available for iOS users.

Reliable connection

With the Botslab app, available on the App Store and Google Play, you can remotely monitor your home with live viewing on a compatible device. The camera also offers two-way audio communication with noise cancellation and human voice amplification, so you can chat with your family or scare off an uninvited guest. A built-in dual microphone with a range of up to 6 meters provides high quality audio.

Convenient data storage

The camera offers several data storage options, including on a microSD card (not included) with up to 256 GB of storage capacity and in the Botslab cloud. The one-year trial version of the Botslab cloud allows the camera to capture and store motion detection video recordings for up to 7 days. It supports continuous recording as well as event recording, giving you full control over the recorded footage.

Integration with smart systems

The camera integrates with Amazon Alexa and Google Assistant for easy voice control. It supports 2.4/5 GHz Wi-Fi and wired connection, resulting in a stable and reliable connection. One-touch and gesture call making is also available.
