

## 360° Indoor WiFi Camera Botslab 2C Pro C222 5MP 5G

Ref: 6976880780117

360° Indoor WiFi Camera Botslab 2C Pro C222 5MP 5G

**Botslab 2C Pro C222 5MP 5G rotating WiFi indoor camera**

Take care of your home's security around the clock. The Botslab C222 offers exceptional image quality at 3K (5MP) resolution. With an F2.0 aperture and HDR technology, the camera captures detailed and sharp images, regardless of lighting conditions. Advanced night mode, using both infrared and color technology.

**Wide range and intelligent AI functions**

The camera has a wide monitoring range of 360° horizontally and 156° vertically, allowing full coverage of a large area. Advanced AI functions, such as detection of people, pets, crying, and notifications of potential intrusion and leaving the room, provide a high level of security. There are also Panoramic Patrol modes that cover every angle with smooth rotation, and Fixed-Point Patrol that focuses on frequently monitored areas.

**Advanced night mode and privacy**

The camera offers an advanced night mode that uses both infrared and color technology to provide clear images even in total darkness. As a result, it does not disturb the sleep and rest of household members. The camera also has a scheduled privacy mode, and an automatic mode that is only available for iOS users.

### Remote monitoring and two-way communication

With the Botslab app, available on the App Store and Google Play, you can remotely monitor your home with a live view on a compatible device. The camera also offers two-way audio communication, allowing you to chat with your family and scare off uninvited guests. What's more, a one-touch connection feature and voice control capabilities with Amazon Alexa and Google Assistant make the camera a convenient and effective tool for monitoring your home.

### 2 ways to store recordings

The camera offers flexible data storage options, including on a microSD card of up to 256 GB and in the Botslab cloud. The one-year trial version of the Botslab cloud allows you to capture and store motion detection video recordings for up to 7 days. It supports continuous recording as well as event recording, giving you full control over the recorded footage.

### Versatility of installation and application

The C222 camera is a versatile device that can be mounted both on the ceiling and on the wall using the included base. With features such as cry detection and 24/7 monitoring, the camera will be perfect for homes with young children. For parents of children of all ages, it offers a variety of monitoring features such as smart motion tracking, facial recognition, and gesture or one-touch call making.
