

360° Outdoor WiFi Camera Botslab PT W312 4MP 5G

360° Outdoor WiFi Camera Botslab PT W312 4MP 5G

Ref: 6974772421797

Botslab PT W312 4MP 5G rotating WiFi outdoor camera

The Botslab W312 outdoor camera delivers 2.5K (4MP) resolution images and offers excellent recording quality, both day and night. With its wide F1.6 aperture and 1/2.7" CMOS sensor, it captures detailed and clear images even in low light. In addition, it supports 2.4GHz and 5GHz Wi-Fi connection for stable and fast data transmission.

Wide range of monitoring and advanced capabilities

The Botslab W312 camera offers a wide field of view of 109.6°*91.5°*46.1° and the ability to pan 340° and tilt 90°. As a result, it eliminates blind spots and provides full control over the monitored area. Equipped with 850nm IR LED and color night vision mode, it provides excellent night vision so you can feel safe around the clock. Night vision mode with four built-in LEDs (color and IR) guarantees clear images up to 30 meters.

Intelligent AI features

The Botslab W312 is equipped with advanced AI functions such as vehicle recognition, vehicle protection and illegal parking monitoring. Thanks to its AI 1.2T chip, the camera can automatically track the movement of objects, providing two-way zoom to closely monitor key areas. What's more, audio and light alarms are triggered when motion is detected, enhancing security.

Easy storage and data accessibility

The Botslab W312 camera allows you to store recordings on a microSD card of up to 256 GB (not included) and on the Botslab cloud. The one-year trial version of the Botslab cloud allows for 7-day storage of 5-second motion-detected recordings, with 5-minute gaps between recordings, ideal for long-term and secure data storage.

Convenient control

Use the camera without interference. Support for Amazon Alexa and Google Assistant voice commands, as well as the Botslab app available on the App Store and Google Play, allows you to easily manage the camera from your smartphone. In addition, two-way audio with stereo sound and noise cancellation up to 6 meters allows you to communicate with loved ones, even when you're away from home.

Advanced monitoring modes

The Botslab W312 camera offers various monitoring modes, such as Panoramic Patrol, which covers every angle with smooth rotation, Fixed-Point Patrol, focusing on frequently monitored areas, and One-Tap for Panorama, allowing you to instantly capture a full 360° view. Compatibility with NVRs and the ONVIF protocol allows several cameras to be managed simultaneously, which is ideal for larger security systems.
