Kids smartwatch Botslab E3 (pink)

Ref: 6974768880256

Botslab E3 children's smartwatch (pink)

The Botslab E3 smartwatch was created with the safety and comfort of every child in mind. With advanced features such as video monitoring, precise location tracking, as well as water resistance and long operating time, the device provides peace of mind for parents.

Precise location tracking and safe zones

With GPS, GLONASS, Wi-Fi and other technologies, the Botslab E3 provides precise location tracking. You can set safe zones and receive notifications when your child leaves them. In addition, you'll gain access to historical routes that allow you to see where your little one has been in the past 7 days.

SOS button

In an emergency, your child can use the SOS button. Simply hold it down for 5 seconds to send an emergency signal to the caregiver along with the current location. This allows both parents and their kids to enjoy a greater sense of security.

Video monitoring and 4G connectivity

The remote video monitoring function allows you to keep an eye on what your child is doing. With 4G video call support, your little one can contact you at any time. A high-quality 2MP camera ensures clear images during calls. Note: these features are only available in

select countries such as Vietnam, Russia, Turkey, Croatia and Taiwan.

Waterproof and long working time

The Botslab E3 is IPX8 waterproof, so your child can freely wear the watch on rainy days. The durable 850 mAh battery provides 3 to 7 days of operation on a single charge (depending on the intensity of use).

Practical modes with the youngest in mind

The Closed-off Security system ensures the child's privacy - only parent-approved contacts can contact the watch's little owner, and access to inappropriate content is completely blocked. In addition, in School mode, access to distracting apps and games is blocked. During lessons, your little one will be able to check the time and receive SOS calls.

Additional conveniences

The watch also offers a pedometer that encourages kids to be physically active. You can monitor your kid's daily activity and support them in their pursuit of a healthy lifestyle. The 1.3-inch color display provides an easy-to-read 240x240-pixel resolution, and will not be difficult for young users to operate. The silicone strap is durable and resistant to wear marks.

Included:

Botslab E3 children's smartwatch
Wrist strap x2
SIM card removal tool
USB charging cable
User manual

Manufacturer Botslab
Model E3
