Dash camera Botslab HK30 Pro 1080p

Ref: 6974772423036

Botslab HK30 Pro 1080p video recorder

The Botslab Dash Cam HK30 Pro video recorder provides exceptional recording quality thanks to its 2K resolution. The wide viewing angle (140°) allows you to capture every detail on the road, which increases safety while driving. In addition, the Emergency Recording Locked function ensures that all important moments are secured. The compact, modern design makes the device fit perfectly into the car interior.

High image quality

Thanks to its 2K resolution, the Botslab Dash Cam HK30 Pro video recorder provides extremely clear and detailed recordings. Even the smallest details, such as vehicle registration numbers, are perfectly visible, which is especially important when analyzing traffic incidents.

Wide viewing angle

The 140° viewing angle lens allows recording a wide field of view. This makes it possible to capture more details from the vehicle's surroundings, which increases safety and gives a more complete picture of the traffic situation.

Automatic locking of emergency recordings

The Emergency Recording Locked function automatically secures recordings when a sudden event, such as a collision, is detected. These recordings are protected from being overwritten, ensuring access to vital evidence when needed.

24/7 parking monitoring and loop recording

The device offers 24/7 parking monitoring with time-lapse and normal, collision-triggered recording functions. Additional cabling (not included) is required to use this feature. The Loop Recording function ensures that the video recorder records without interruption, overwriting the oldest recordings to always provide space for new ones.

Compact design

The Botslab Dash Cam HK30 Pro features a miniature design that does not interfere with the driver's view. The sleek, modern casing makes the device blend in perfectly with the interior of any vehicle.

Hassle-free installation

The video recorder is easy to install thanks to its hidden wire system. Just stick the device in the right place to enjoy the neat look of the car interior without unnecessary cables. The kit includes all necessary accessories for installation, such as a power cord, electrostatic sticker and mounting tool.

Stable connection and updates

With regular OTA updates, the video recorder always offers the latest features and improvements. From the mobile app, you can monitor recordings in real time, which increases your control over vehicle safety.
