Niimbot K3 portable label printer (cream)

Ref: 6977031210460

Niimbot K3 Commercial Cream

Niimbot K3 portable label printer (cream)
The Niimbot K3 label printer is a powerful device that is great for both home and office use. With its compact dimensions of 232 x 145 x 148 mm and a weight of just 1.2 kg, the printer is easy to carry and does not take up much space on your desk. With the Niimbot K3, organizing and marking items becomes simple and efficient, saving time.

Unmatched print quality
With a resolution of 203 dpi, each label is clear and legible, significantly improving the aesthetics of the printouts. Thermal printing eliminates the need for ink or toners, further reducing utility costs. As a result, you can count on durable prints that are resistant to fading and smudging, making the Niimbot K3 ideal for printing a variety of labels.

Fast printing
A print speed of 180 mm/s allows you to quickly prepare a large number of labels in a short period of time. This is ideal for companies that need to label products or documents quickly. The high print speed does not compromise quality, making the Niimbot K3 ideal for applications that require both productivity and precision. This allows the printer to meet the needs of a variety of industries, from logistics to retail, where fast and accurate labeling is crucial.

Wide compatibility

The Niimbot K3 printer is compatible with a wide range of devices and operating systems, including Android, iOS and Windows 7/10, and you can pair it simultaneously with 10 smartphones (x3 iOS and x7 Android). Connectivity via Bluetooth and USB makes it easy and fast to connect to various devices for added convenience. This allows you to print labels directly from your smartphones, tablets or computers, greatly improving your work process.

User-friendly

The Niimbot K3 supports labels from 20mm to 80mm wide and from 15mm to 300mm long. In addition, it supports the RFID function for Niimbot label rolls, which enables automatic recognition of the type of label and makes your work even easier. With this function, you can quickly and easily change label types without having to manually set printing parameters, which greatly speeds up the labeling process.

Dedicated app

The Niimbot app, available on the App Store and Google Play, allows you to easily design and print labels directly from your phone or tablet. You can use a variety of pre-made templates or create your own designs, giving you full control over the appearance of your labels. With the ability to sync with the cloud, label designs can be stored online and accessed from a variety of devices, making it even more convenient to use.
