Niimbot D110M Portable Label Printer White

Niimbot D110M portable label printer (white)
The Niimbot D110M label printer is a small, lightweight device that will find its use in the store, home, office, etc. Equipped with a 1500 mAh rechargeable battery, it offers a long working time, and you can renew its energy with a USB-C cable (included). Thanks to its thermal technology, it prints clear labels with a width of 12 mm, and Bluetooth allows easy connection to a smartphone. In addition, the Niimbot app, available on the App Store and Google Play, allows you to intuitively design and edit labels.

Compact and portable design
The Niimbot D110M features a lightweight, portable design, so storing and transporting it won't be a problem for you. The device does not require ink, which reduces operating costs and makes it easy to use. You can easily charge it with a USB-C cable, and the 1,500 mAh battery provides long battery life, which is convenient for daily use.

Easy connectivity and wide compatibility
The Niimbot D110M printer connects to smartphones via Bluetooth, making it quick and easy to connect to various devices. The Niimbot app, available on the App Store and Google Play, allows you to easily design and edit labels directly from your phone. The app's intuitive interface makes label creation easy and fun, and cloud syncing allows you to store and access your designs from different devices.

High quality and speed printing
The Niimbot D110M offers 203 dpi thermal printing for clear and legible labels. The device supports labels 12 mm wide and up to 15 mm long, and the print speed is max. 40 mm/sec. This is the perfect solution for those who need to label products, documents or other items quickly and efficiently. In addition, RFID technology automatically recognizes the type of label, which makes work easier and more convenient.

Safety and functionality
The Niimbot D110M printer is equipped with a plastic edge for tearing off labels, which reduces the risk of injury during operation. The automatic roll paper retraction prevents ease of use, and the operating temperature range of 5°C to 40°C makes the printer work reliably in a variety of conditions, making it a versatile tool for labeling in different environments.
