OpenRock X wireless open ear headphones (black)

Indulge in an audio revolution with OpenRock X headphones, which combine incredible sound quality with unmatched wearing comfort. They offer everything you need to enjoy music, movies and conversations in the highest quality wherever you are.

Cinematic sound quality

OpenRock X will transport you into a world of incredible sound experiences thanks to BassDirect™ technology, which directs the speaker's energy directly to your ears for powerful bass. The LISO 2.0 algorithm guarantees crystalline sound across the frequency spectrum. With a dynamic 14.2mm driver and surround sound, you'll feel the sound surrounding you from all sides, just like in a movie theater or concert. The headphones support the AAC and SBC codecs, guaranteeing high-resolution audio and wide compatibility with Android and iOS.

Call clarity in all conditions

Thanks to advanced noise cancellation technology with four microphones and AI algorithm, your conversations will always be clear, regardless of the environment. Advanced signal processing technology in the microphones eliminates background noise and precisely directs sound, allowing you to talk comfortably even in windy conditions or noisy environments.

Instant pairing and stable Bluetooth connection

With Bluetooth 5.3, the OpenRock X headphones provide a fast and stable connection to your devices. The Multipoint feature allows you to pair two devices simultaneously, so you can easily switch between them. The headphones will automatically adjust to the priority of calls, for example, switching to a phone call. This is ideal for those who use multiple devices simultaneously, ensuring continuity and convenience.

Three playback modes for every situation

OpenRock X headphones offer three unique sound modes that adapt to different activities and preferences, providing an unparalleled audio experience in any situation. Rock Mode is the perfect choice for intense workouts. It enhances the dynamics and deep bass of your favorite tracks. Relax Mode, on the other hand, allows you to discover tranquility and harmony through an even distribution of sound. It subtly accentuates the tones of classical and ambient music, creating the perfect backdrop for tranquility and relaxation. Boom Mode, on the other hand, provides crisp and immersive sound, even in loud places, thanks to its amplified SPL level. It allows you to enjoy full sound, regardless of the surrounding noise.

Long-lasting performance

Now your favorite songs and podcasts will accompany you from morning to evening! OpenRock X offer 12 hours of playback on a single charge, and with the charging case you can extend their runtime up to 48 hours. Fast charging makes just 5 minutes enough for an hour of extra music, so you'll never be left without your playlist for long.

Comfort and fit

The OpenRock X headphones are designed for maximum comfort. With an adjustable ear hook (50°x45°), you'll get the perfect fit, and the open design ensures ear and hearing health, air permeability and also awareness of your surroundings, giving you greater safety while listening to music. In addition, the IPX5-rated resistance allows you to use the headphones during intense exercise or changing weather conditions.

Smart features and personalization

With the OpenRock X mobile app, you can customize sound settings such as the equalizer, sound modes, as well as the location of the headphones or software updates. Choose from three sound modes - Rock Mode, Relax Mode and Boom Mode - to perfectly match the sound to your activity and preferences.
