

Diagnostic Scanner OBD2 Ancel AS100/AC100

Diagnostic Scanner OBD2 Ancel AS100/AC100

Ref: 5906168439131

Ancel AS100/AC100 OBD2 diagnostic scanner

The Ancel AS100/AC100 OBD2 diagnostic scanner is an advanced device that enables comprehensive diagnostics of OBDII protocol-compliant cars. It is an indispensable tool for any vehicle owner who wants to monitor the technical condition of his car and avoid costly repairs. With this scanner you can quickly and easily identify problems with the engine and other systems of the vehicle.

Diagnostic functions

The Ancel AS100/AC100 scanner offers a wide range of diagnostic functions that provide full control over the vehicle's technical condition. The device can read error codes, allowing you to quickly and accurately diagnose engine problems. After repairs, stored error codes can be easily deleted, which is an invaluable feature. In addition, the scanner allows you to check the vehicle's readiness for emission tests, monitor live engine parameters and read detailed vehicle information.

Ease of use

The device is extremely easy to use. Thanks to its compact size, the scanner fits in the palm of your hand for convenient carrying and use anywhere, anytime. The clear screen and intuitive menus make navigating the functions extremely easy. The scanner is ideal for both professional mechanics and amateurs who take care of their vehicles.

Compatibility

The Ancel AS100/AC100 scanner is compatible with a wide range of vehicles. It supports European cars compliant with standard EOBD protocols after 2003, American and Australian cars with OBD2 protocols after 1996, and Asian cars with OBD2 protocols after 2005. This makes it a versatile diagnostic tool that can be used with a wide variety of vehicles.

Additional capabilities

The scanner offers features such as disabling the Check Engine light, which allows you to quickly turn off the light after fixing the problem. It also helps monitor exhaust emissions. With the test readiness check function, it reports on the vehicle's readiness status for emissions tests. The device also enables the display of sensor data, allowing you to view detailed data from various vehicle sensors.

Manufacturer

Ancel

Model

AS100/AC100

Kompatybilność

Supports OBDII/EOBD compliant vehicles

Communication protocol

CAN, ISO9141, KWP2000, J1850 PWM, J1850 VPW

Display type

LCD

Display resolution

128x64 pixels

Error code reading

Yes

Deleting error codes
