

PowerLocus P1 wireless headphones for kids (blue-black)

Ref: 5060726254892

PowerLocus P1 wireless headphones for kids (blue-black)

PowerLocus P1 wireless headphones for kids (blue-black)

Meet the PowerLocus P1 wireless headphones - the perfect solution for kids that combines exceptional comfort with high sound quality. A volume limit of up to 85 dB ensures safe use, while 40-millimeter drivers guarantee delightful sound. Various playback options are also available, including from a microSD card or via Bluetooth.

Various connectivity options

The PowerLocus P1 headphones offer flexibility in connection methods - they can be used both wired with a 3.5mm audio cable and wirelessly via Bluetooth 5.3. This is ideal for children, allowing them to switch freely between modes as needed.

Long playback time

The headphones provide a runtime of about 15 to 20 hours on a single charge, allowing you to listen to your favorite music, watch cartoons or talk for long periods of time without the need for frequent charging. Don't worry that a drained battery too quickly will spoil your child's fun!

Safe volume limit

PowerLocus P1s provide a volume limit of up to 85 dB, which protects children's delicate hearing from damage. This is an extremely

important feature that guarantees safety during prolonged use without worrying about ear health.

Excellent sound quality

The 40-millimeter drivers provide full and rich sound with a wide frequency response from 20 Hz to 20,000 Hz. As a result, children can enjoy high quality sound whether listening to music or watching cartoons.

Ergonomic design

The headphones are designed for maximum comfort - they are very lightweight (only 168 g), and have soft ear cups and an adjustable headband that ensures a perfect fit for your child's head. The ergonomic design means that the PowerLocus P1 can be worn for extended periods of time without feeling uncomfortable.

Even more options

The headphones have a built-in microphone that allows you to talk freely, plus they support Multi Point technology for connecting them to more devices. What's more, the P1s support music playback from microSD cards, so you can save the stories or songs of your choice to an external storage device and be sure you know what your child is enjoying. There's also an FM mode that allows you to listen to the radio.
