## Portable 2-in-1 Air Pump Flextail Tiny Pump (white)

Portable 2-in-1 Air Pump Flextail Tiny Pump (white)

Ref: 6975755964331

Flextail Tiny Pump 2-in-1 Portable Pump (white).

The Flextail Tiny Pump 2-in-1 is a unique solution for those who value mobility and versatility. Its cordless design, compact size and light weight make it an ideal choice for travelers, camping enthusiasts and anyone who appreciates convenience in any conditions. The Flextail Tiny Pump is more than an ordinary pump - it's a tool that makes life easier in many situations.

**Lightweight and comfortable**

The Flextail Tiny Pump weighs only about 45 grams, making it one of the lightest pumps on the market. This light weight, combined with its compact dimensions (about 6 x 4 cm), provides unparalleled comfort for transport. You can easily strap it to your backpack without worrying about extra weight.

**Versatility of nozzles**

The set of five different nozzles included with the Flextail Tiny Pump makes the device extremely versatile. It allows you to easily inflate sleeping mats, swimming rings, inflatable mattresses and get rid of air from vacuum bags. Its versatility makes it an ideal companion both on vacation and at home.

**Smart charging indicator**

A practical light indicator is another advantage of the Flextail Tiny Pump. It informs about the charging status of the device: a red light indicates an incomplete charge level (0-99%), while a green light indicates a full charge (100%). This way the user always knows when the pump is ready for use.

#### Inflate and blow functionality

The Flextail Tiny Pump is not limited to inflating only. Its air blowing capability is equally effective, making it much easier to deflate air from items such as mattresses or vacuum bags. This bi-directionality makes it extremely useful in a variety of situations.

#### Portable and convenient to use

The Flextail Tiny Pump's cordless design and its light weight make it extremely convenient to use. The fact that it doesn't need to be connected to a power source and is easy to carry (thanks to its practical handle) make it an ideal tool for traveling. Just charge it through the Type C interface and it's ready to go in any conditions.
