Satisfyer Pro 2 Modern Blossom clitoral massager

The Satisfyer Pro 2 Modern Blossom is a unique rose-shaped clitoral massager that uses Air Pulse technology and innovative Liquid Air technology. It is an excellent choice for both beginners and experienced users. The massager is charged via a USB cable, so it's always ready for the next use.

Unparalleled stimulation thanks to Liquid Air Technology

The Satisfyer Pro 2 Modern Blossom is distinguished by its innovative Liquid Air technology, which mimics the pulsing waves of water. Air Pulse technology, on the other hand, provides sensual clitoral stimulation without direct contact. With 11 pressure wave settings, you can adjust the intensity to suit your needs - from gentle strokes to deep, intense sensations.

Body-friendly silicone finish

The massager is made of the highest quality, medical-grade silicone, which is extremely soft and gentle on the skin. The Satisfyer Pro 2 Modern Blossom is fully waterproof (IPX7), so you can enjoy its company both in the shower and bath. Its hygienic finish makes it easy to clean - all you need is warm water, mild soap and erotic gadget cleaner.
