Maintenance-free AGM VRLA Green Cell AGM15 6V 4Ah Battery (for alarm system, cash register, toy)

Maintenance-free AGM VRLA Green Cell AGM15 6V 4Ah Battery (for alarm system, cash register, toy).

The Green Cell AGM AGM15 battery with 6V voltage and 4Ah capacity is the perfect solution for those who need a reliable power source. Made of high-quality materials, this battery is ideal for both buffer and cyclic operation. Thanks to the AGM (Absorbent Glass Mat) technology used, the electrolyte has been absorbed into a fiberglass separator, which prevents leakage and allows the battery to be used safely in various positions. This makes the AGM15 a much safer alternative to traditional lead-acid batteries.

AGM technology - safety and durability

The Green Cell AGM15 battery is based on AGM technology, which guarantees exceptional durability and safe use. The electrolyte is absorbed in a fiberglass separator, which eliminates the risk of leakage and allows the battery to operate in any position. This technology makes the battery ideal for use in a variety of devices, such as alarm systems, cash registers and electric toys. AGM15 provides long life and high current capacity, regardless of the operating conditions.

Versatility of use - cyclic and buffer operation

The AGM15 battery is designed for both cyclic and buffer operation. In cyclic mode, the battery acts as a standalone power source, ideal for frequent charging and discharging, making it ideal for devices such as electric toys. In buffer mode, on the other hand, it acts as an emergency power supply, guaranteeing continuous operation of equipment in the event of a main power source failure. This makes the

AGM15 indispensable in alarm systems and other critical applications.

Maintenance-free operation and long service life

The Green Cell AGM15 battery is designed for maintenance-free operation for more than 5 years. It requires no maintenance or electrolyte topping up, making it extremely convenient to use. In addition, thanks to AGM technology and the use of VRLA valves, the battery provides full safety of operation in various positions, as well as shock and vibration resistance. It is ideal for demanding users who value reliability and comfort.

Safety and convenience of use

Thanks to its sealed design, the AGM15 battery does not emit fumes, making it safe for use in closed spaces. Its toughness to withstand harsh working conditions and the ability to be mounted in any position further enhance the convenience of use. Green Cell AGM15 is a sure choice when it comes to powering alarm systems, cash registers, toys and other devices.

Name:Maintenance-free AGM VRLA Battery Green Cell AGM15 6V 4Ah (for alarm system, cash register, toy)Manufacturer:Green CellModel:AGM15Type:VRLA AGMVoltage:6VCapacity:4AhColor:BlackWeight:680gDimensions (length x width x height):70 x 47 x 101mmOverall height (with connectors):107mmTerminal:Faston 187 (F1)Internal resistance: $\leq 30\text{m}\Omega$ (at 25°C)Self-discharge:2% per month (at 25°C)Lifetime:More than 5 yearsApplication:Alarm systems, toys, cash registersBuffer charge:6.75-6.90V (-10 mV/°C)Cyclic charging:7.2-7.5V (-15 mV/°C)Maximum charging current:1.2ACapacity range:Less than 10AhWarranty:24 monthsCondition:New
