Smartwatch Blitzwolf BW-HL5 (gold)

The Smartwatch Blitzwolf BW-HL5 is designed with functionality, comfort, and style in mind. Its curved construction not only ensures a perfect fit on the wrist but also an elegant look. With a wide range of dials and menus to choose from, every user can customize the watch to their individual preferences. Bluetooth 5.3 ensures a stable connection, and compatibility with Android and iOS provides versatility. The watch also offers an impressive set of features, including health and activity monitoring, IP67 waterproofing, and long battery life on a single charge, making it an indispensable companion for everyday life.

Ergonomic design

The Blitzwolf BW-HL5 stands out with its ergonomic design, featuring a slightly curved construction that perfectly complements the wrist line. This design not only enhances wearing comfort throughout the day but also ensures better display readability. The 2.1-inch IPS screen with a resolution of 320 x 386 pixels offers bright and clear colors, facilitating notification and data reading in any conditions.

Bluetooth 5.3 Version

The modern Bluetooth 5.3 technology provides fast and stable connection with your smartphone, minimizing the risk of call interruptions. This allows users to enjoy smooth synchronization of call notifications, messages, and data from health and sports applications without worrying about losing important information.

IP67 Waterproofing

The Blitzwolf BW-HL5 is designed for active users, offering IP67 waterproofing. This means that the watch is resistant to dust, sweat, and short-term immersion in water, making it an ideal companion for workouts, swimming, or everyday use regardless of weather conditions.

Health and Activity Monitoring

The watch offers advanced health monitoring features, such as heart rate measurement, blood pressure, blood oxygen level (SpO2), and glucose, allowing real-time tracking of key health indicators. Additionally, numerous sports modes, pedometer, calorie counter, and distance meter allow customization of monitoring to the user's individual needs and training goals.

Long Battery Life on a Single Charge

With a 300mAh battery capacity, the Blitzwolf BW-HL5 provides up to 7 days of usage on a single charge, and in standby mode, it can work for up to 20 days. The magnetic charging system allows quick and convenient recharging of the watch, minimizing the time needed to restore full device functionality.
