Etui Torras Pstand Series do iPhone 16 Plus (transparente)

Torras Pstand Series Case for iPhone 16 Plus (transparent)

The Torras Pstand case for iPhone 16 Plus features a magnetic design and offers a stable stand for comfort and protection of your device. It also allows fast wireless charging, and compatibility with magnetic accessories enhances its functionality.

Stability and security

The practical stand guarantees stability when using the phone. The solution used is particularly useful when watching movies and video conferencing. Thanks to MegaMag™ technology and N56 magnets, the case is great for traveling and reliably stays in place even on uneven surfaces, making it easier to use navigation applications.

High quality manufacturing

Pleasant-to-the-touch materials were used for the Torras Pstand case, which provide a secure grip, minimizing the risk of the phone slipping out of your hand. Precisely made cutouts allow comfortable use of all functions. The accessory also prevents the device from overheating during intensive use.

Protection against drops

Thanks to X-Shock™ technology and multi-layer construction, the case provides four times higher drop resistance compared to standard

products. The product offers military-grade (Mil-Grade) protection against falls from heights of up to about 3.6 meters. The 360° Airbag technology guarantees full protection of the phone's edge, absorbing shocks and minimizing the risk of damage. In addition, the raised edge further protects the lens.
