HOTWAV Cyber 13 Pro Smartphone - 6.6" 12+8/256GB Black

HOTWAV Cyber 13 Pro smartphone - 6.6" 12+8/256GB Black

HOTWAV Cyber 13 Pro is a smartphone designed for those who expect more from their device. Equipped with a powerful 10800mAh battery, a 6.6" FHD+ display, and an ultra-bright 150 lumens flashlight, the Cyber 13 Pro is ready for any challenge. With an advanced UNISOC T619 processor, 20GB RAM (12GB RAM + 8GB expandable memory) and 256GB internal storage, it offers outstanding performance, smooth operation, and huge storage capacity. Water, dust and drop resistance (IP68/IP69K/MIL-STD-810H), along with features such as NFC, GPS, and fast charging, make the Cyber 13 Pro the perfect companion for both the urban jungle and the wilderness trail.

Unparalleled performance

The Cyber 13 Pro is made to last. With IP68 and IP69K protection, the smartphone is fully waterproof to a depth of 1.5 meters for 30 minutes, resistant to dust and dirt, and will withstand drops from up to 1.2 meters. The rugged construction, combined with a modern design, makes the Cyber 13 Pro not only a highly durable device, but also a stylish one that stands out in the crowd.

Will keep up with your needs

One of the Cyber 13 Pro's unique features is its extremely bright 150-lumen flashlight, which will light the way even in the darkest conditions. The smartphone is also equipped with a battery with an impressive 10800mAh capacity, which provides long hours of use on

a single charge. Whether you're using the phone for intense gaming, watching videos or communicating, you can be sure it won't let you down. The OTG reverse charging feature allows you to charge other devices, making the Cyber 13 Pro the perfect companion for travel and expeditions.

Excellent photo and video quality

The Cyber 13 Pro has a suite of advanced cameras, including a 64MP main camera with Phase Detection Autofocus (PDAF) technology, which quickly and accurately focuses on moving objects to capture every detail in excellent quality. In addition, an 8MP wide-angle camera with a 120° field of view allows you to capture a wider perspective, ideal for landscape or group shots. The 16MP front camera ensures sharp and crisp selfies. Capture unforgettable moments beyond memory!

Powerful power and performance

At the heart of the Cyber 13 Pro is a UNISOC T619 chipset with a maximum clock frequency of 2.2GHz, backed by an Arm Mali-G57 graphics chip. Combined with 20GB RAM (12GB RAM + 8GB expandable memory) and 256GB UFS-2.2 ROM, the device offers impressive performance and smooth operation. The ability to expand memory up to 2TB allows you to store huge amounts of data, apps and media without worrying about running out of space.

A display that brings your content to life

The HOTWAV Cyber 13 Pro features an impressive 6.6-inch FHD+ display with 1080x2408 resolution that takes image quality to a whole new level. Whether you're browsing photos, watching videos or surfing the web, this screen delivers crystal clear images and vibrant, realistic and immersive colors. The bright display ensures that even in bright sunlight, all content remains clear and readable. The 60Hz refresh rate ensures a comfortable user experience without any lags or stutters.

Security and functionality

The smartphone offers advanced security features such as fingerprint unlocking and facial recognition for fast and secure access to the device. With NFC support, the Cyber 13 Pro enables convenient contactless payments via Google Pay. Global support for 4G LTE bands means you can use the device worldwide without worrying about coverage.
