Telesin three-channel box charger + 3 TELESIN batteries for GoPro Hero 9 / 10 / 11 / 12

Box Telesin three-channel charger + 3 batteries TELESIN for GoPro Hero 9 / 10 / 11 / 12.

The TELESIN charger for charging the batteries of GoPro Hero 9, 10, 11 and 12 series cameras is designed for those who require their devices to be ready at all times. Not only does it allow you to instantly charge the three batteries, but also allows you to safely store them along with memory cards. The kit also includes 3 rechargeable batteries with a capacity of 1750 mAh each.

High performance and fast charging

The charger allows you to charge three batteries at the same time, being an ideal solution for those who need a long run time for their camera. Thanks to its high charging current (2.4A), it takes only 2.5 hours to fully charge, giving you up to 112 minutes of operation for a single battery (depending on the selected camera settings).

Safe and practical solutions

The device offers nine levels of protection, ensuring safety during both charging and battery storage. A magnetic closure ensures easy and sturdy handling, while silicone components prevent accidental dropping of the charger. Built-in LED indicators show charging status, allowing you to monitor energy levels on an ongoing basis.

Compactness and versatility

Despite its three-channel design, the TELESIN charger is compact won't take up much space in a backpack. Integrated slots for TF cards and batteries make it easy to organize your equipment. The device features a USB-C port, which eliminates the need for additional adapters and allows charging from various sources such as powerbanks, laptops or car chargers.
