BlitzWolf BW-VS3 100" projection screen.

The BlitzWolf BW-VS3 100" projection screen is a solution that will take your visual experience to a whole new level. Designed for home movie buffs and professionals who need a reliable presentation tool, the BW-VS3 offers a huge 100" projection surface and support for 4K Ultra HD resolution. This allows you to enjoy a crystal-clear image with vivid, realistic colors, regardless of lighting conditions. The special optical structure and anti-reflective coating guarantee clear images even in bright rooms, and the easy installation makes the screen ready to use in just minutes. In addition, the BW-VS3's ultra-narrow bezel and sleek design make it fit seamlessly into any interior while offering a unique visual experience.

Easy installation for everyone

The BlitzWolf BW-VS3 is designed with simplicity of installation in mind. Regardless of your technical experience, installing this screen is quick and easy, so you can enjoy your favorite movie or presentation almost immediately.

Impressive screen

With a large 100-inch projection area, the BW-VS3 provides an amazing visual experience. The 4K Ultra HD resolution offers a crystal clear image that draws you into the action as if you were part of every scene.

High brightness and glare resistance

The screen features high brightness, which guarantees clear and vivid images even in bright rooms. In addition, a special anti-reflective coating reduces glare, providing excellent picture quality both during the day and at night.

Realistic colors and wide viewing angle

The BW-VS3's true color restoration technology enables images to be viewed in their natural colors, making any scene look incredibly realistic. The wide 160° viewing angle allows you to enjoy excellent image quality from anywhere in the room. The screen also provides much better brightness, contrast and color fidelity compared to traditional projection screens. This means you can enjoy exceptional picture quality in your home theater, getting an immersive visual experience that was previously only available in professional settings.

Narrow bezel for a better experience

The ultra-narrow bezel of the BlitzWolf BW-VS3 screen makes the image more immersive, while adding a modern look to your interior. This makes the screen blend in perfectly with any decorative style.

Special optical structure

The BW-VS3 screen's unique optical structure reduces 93% of ambient light, ensuring a clear and sharp image regardless of lighting conditions. With a prismatic TPU layer and a transparent PET layer, the screen effectively absorbs light, minimizing visual interference.
