Educational mat with piano Huanger HE0650

Huanger HE0650 educational mat with piano.

Huanger Educational Mat is a gymnastic mat that promotes sensory development and strengthens your baby's muscles from the first days of life. Equipped with colorful pendants, a large mirror and a piano, the mat adapts to the different stages of your baby's development. Made of the highest quality, soft-touch material, the mat is safe and comfortable, encouraging active play and learning. The HE0650 offers three different ways to play: a toddler can lie on his back, play with the toys and hit the piano keys with his feet, practice lifting his head and learn about the world, while an older child can sit up and press the keys with his hands.

Safe and engaging play

The Huanger HE0650 mat is designed to keep your baby safe and comfortable, insulating him from the cold floor and stimulating physical and motor development. With a variety of features and play options, the mat provides hours of joyful activity and learning. In addition, the piano with melodies acts as a music box next to the crib or an interactive music table, which develops the baby's motor skills, hearing and vision.
