

Portable Flextail Zero Pump

Portable Flextail Zero Pump

Ref: 6975755962047

Flextail Zero Pump Portable Pump

The Flextail Zero Pump Portable Pump is an essential tool for any outdoor adventurer. Designed to provide maximum convenience and efficiency - it weighs only about 34 grams and measures 26 x 75 mm. As a result, it will fit into any backpack! The device can not only pump, but also deflate, and comes with a replaceable 650 mAh RCR123A battery that guarantees up to 25 pumping cycles on a single charge.

Always at hand

With an ultra-compact design measuring just 26 x 75 mm and weighing about 34 g, the pump is extremely easy to carry and store. It will easily fit in a backpack, or you can attach it to a key ring. Its additional advantage is its solid, durable construction - don't be afraid of damaging it quickly.

Impressive capabilities

With patented AIRVORTECH 2.0 technology, an airflow of 180 l/min and a pressure of up to 2.5 kPa, the Zero Pump can refill the air in a hiking mattress in just about 50 seconds. It also includes a powerful RCR123A battery with a capacity of 650 mAh, which ensures a long operating time of the device. This makes it possible to inflate up to 25 sleeping bags on a single charge! What's more, if necessary, you can easily replace the battery with a new one.

6 nozzles included

The set includes as many as 6 different nozzles, so you can freely use the pump in combination with travel mattresses of various well-known brands, such as KLYMIT, NEMO or BIG AGNES. High-quality soft rubber is used to make them, which guarantees a perfect fit and eliminates any air leakage problems.

Additional functions

The pump allows not only to pump, but also to deflate, which further increases its functionality. It can also be used to start a fire, making it an invaluable tool on camping trips. In addition, its quiet operation of 68 dB ensures comfort without disturbing the environment.

Convenient use

Thanks to the clever design of the pump, there is no need to hold it in your hands while pumping. Just attach it to the travel mattress and press the button twice, and the device will take care of the rest. This solution provides more freedom and convenience when preparing for sleep or rest.
