

IPL depilator Ulike Air 10 UI20 PW (biały)

IPL depilator Ulike Air 10 UI20 PW (biały)

Ref: 6974667821510

Ulike Air 10 UI20 PW IPL epilator (white).

The Ulike Air 10 impresses with its innovative epilation methods that will give you maximum convenience and eliminate even the most stubborn hairs from any part of your body. Choose between four modes to customize your epilator and enjoy a pain-free and safe treatment thanks to the cooling and automatic skin type recognition features. The kit comes with the necessary accessories to help with the effectiveness of epilation.

Four epilation modes

The Ulike Air 10 epilator allows you to choose from 4 different modes, depending on what kind of epilation you need. The Fast mode is ideal for minor touch-ups (e.g. removing hair from above the upper lip), the Normal mode levels fine hair (e.g. from the arms), the High mode is indispensable when you want to get rid of denser hair (e.g. from under the armpit), while the AutoGlide mode allows you to remove hair from the entire body and its process takes just 10 minutes (ideal when epilating legs or chest).

Simple and convenient epilation

The equipment provides safe and pleasant hair removal thanks to the SHR, which makes it easy to get rid of even the most stubborn hairs, while the innovative skin protection technology accurately detects each complexion and automatically adjusts the power of the treatment to perform it safely. In addition, the epilator supports a cooling system that maintains a temperature of 18°C during full-body

epilation even after 30 minutes. It protects the skin, prevents burns, and keeps the skin looking like new after each treatment.

Performance at the highest level

The epilator impresses with its powerful output of 26J per series of 4 pulses, which helps remove even the most stubborn hair. This excellent asset ensures that the Ulike Air 10 model will satisfy even the most demanding user with stunning results.

State-of-the-art IPL technology

IPL (Intense Pulsed Light) technology, which the epilator supports, relies on intense illumination by a xenon lamp, which is placed in the head of the device. It targets melanin, so its effectiveness depends on the level of melanin in the skin and hair. Those with fair skin and dark hair will notice the most satisfactory results, because in this case melanin is easily absorbed by the light. To get the most satisfaction and enjoy safe and convenient use, it is worth looking at the compatibility chart in the user manual.

Satisfactory results

With the Ulike epilator you will notice surprising results after just 2 weeks of treatment. According to clinical results from the SGS laboratory, hair growth is reduced by up to 73.33%, the average hair length reduction is 83.28%, and hair density reduction reaches an impressive 96.52%. These excellent statistics make the epilator reliable and guarantee satisfaction with the product.

Handy and convenient to use

The Ulike Air 10 epilator is extremely convenient to use and has a compact size, making it easy to take with you on the go. The package comes with a drawstring bag that you can pack the equipment in, so you can use the epilator anywhere.
