Power Bank Green Cell, PBGC03S, PowerPlay 20000mAh, 22.5W (czarny)

Ref: 5904326374522

Green Cell Power Bank, PBGC03S, PowerPlay 20000mAh, 22.5W (black).

The PowerPlay20s powerbank allows you to charge your devices faster and more efficiently with 22.5W of power. With a capacity of 20000mAh, the powerbank provides enough energy to quickly charge all your mobile devices. With USB-C2 with Power Delivery, USB-C3 and USB-A ports with QuickCharge 3.0, it provides faster charging and compatibility even with devices with high power requirements. Low Power Mode prevents the device from shutting down on its own when charging low-power devices, and durable lithium-polymer cells guarantee long life, retaining up to 70% of initial capacity even after 300 charging cycles.

More USB-C ports

With more USB-C ports supporting higher charging powers and ensuring compatibility with the latest standards, the PowerPlay20s powerbank can definitely do more. It provides efficient and fast charging for several devices simultaneously. So you only need one device to support all your devices!

Great power - even for small devices

The new Low Power Mode function ensures that the powerbank will not shut down while charging devices with low power requirements. Low Power Mode runs for 2 hours and then switches to standard mode, which is enough to charge small electronics and at the same time ensures that the powerbank will not discharge itself. Press the button 2 times to activate the mode to prevent the powerbank from

shutting down on its own, and seamlessly charge your smartwatches or headphones.

Unlimited compatibility for all your devices

The PowerPlay20s offers multi-protocol compatibility, allowing you to charge virtually any device. From watches to smartwatches, iPads, cameras and more, you can always count on reliable power for your gear.

Durability impacting everyday use

The lithium-polymer cells used have an excellent lifespan, retaining 70% of their initial capacity after 300 charging cycles. It's like charging your iPhone 15 1350x and still being able to use the powerbank freely. You'd sooner replace your phone with a new one than think about a new powerbank!

Charge without worrying

The capacious Green Cell PowerPlay20s powerbank is not only about the convenience of fast charging. It uses advanced electronic components that constantly watch over the device's operation to ensure absolute safety at all times. The powerbank intelligently adjusts the power to the connected devices, and also monitors the operating temperature.

Style that expresses your uniqueness

In addition to the version in classic Panther Black, there is now also a choice of a Snow White housing variant. Choose the color that suits your lifestyle, emphasize your individuality. Most importantly: color goes hand in hand with technology. The polymer used to create the case is self-extinguishing (non-flammable), making the PowerPlay20s combine unconventional design with a high level of safety.
