HUB 5in1 MOKiN USB-C PD 3.0 100W (silver)

Ref: 6976301939438

MOKiN USB-C PD 3.0 100W 5-in-1 HUB (silver)

Want to increase your computer's capabilities? Stock up on MOKiN's multifunctional 5-in-1 hub, which offers an HDMI port, a USB-C PD port, two USB-A 2.0 ports and a USB-A 3.0 port. The device allows you to transfer files at speeds of up to 5 Gbps and supports high-definition video display. It is also distinguished by its portable design and compatibility with most popular hardware and operating systems.

Fantastic image quality

Do you want to watch a movie on a bigger screen? Or maybe you need to give a presentation? The MOKiN Hub will prove itself in these and many other situations! The device allows you to display video at 8K / 30 Hz (only for Windows DP1.4 DSC) or 4K / 60 Hz. As a result, it provides exceptional richness of detail and crisp colors! You can also choose from two modes. Mirror allows you to duplicate the image, and Extend gives you the ability to expand the screen.

Fast charging

The Hub also offers a USB-C PD port that supports input power of up to 100 watts and output power of up to 85 watts. This means it can reliably power your laptop - no more worrying about your device draining while you're working, watching an episode of your favorite TV series or playing a game!

Transfer files in no time

The device's USB-A 3.0 port allows you to transfer data at speeds of up to 5 Gbps. So you can transfer your photos or videos in no time! The USB-A 2.0 ports, on the other hand, provide transfer speeds of 480 Mbps and are perfect for connecting devices such as a mouse or keyboard.

Compatible with many devices

An additional advantage of the product is its wide compatibility. The hub works seamlessly with popular operating systems such as Windows, macOS, iPadOS, ChromeOS and Android. It doesn't even require the installation of drivers! The device is also compatible with most commonly used hardware, including external drives, memory card readers, smartphones, keyboards, webcams and printers.
