Sunnylife protective case for Insta360 X4 camera

The Sunnylife X4-SD813 protective case is an indispensable accessory for users of the Insta360 X4 camera. Designed for superior protection - it combines excellent quality materials and practical solutions.

Excellent heat dissipation

Made of graphene composites, this housing conducts heat brilliantly, preventing the camera from overheating during intensive use. This is an extremely important feature that allows the device to work longer and safer in various conditions.

Protection and functionality

The case effectively protects the camera from scratches, bumps and dust. The included lanyard with adjustable slider allows you to safely wear the camera on your wrist, reducing the risk of dropping it. In addition, the accessory's design provides full access to the buttons, microphone, speaker and charging port without restricting the device's functionality.

Compatibility with accessories

The X4-SD813 does not obstruct the camera's bottom adapter, so you can freely mount additional accessories. The case is also compatible with lens hoods, allowing for even more protection and versatility. This is the ideal solution for those who want maximum

protection for their device, while maintaining full functionality and comfort.
