Sunnlylife silicone case + lens cover for Insta360 X4 (white)

The Sunnlylife silicone case and lens cover is a complete protection kit for the Insta360 X4 camera. The included accessories are made of soft, environmentally friendly silicone, are very easy to install and effectively protect the device from bumps and shocks. They are also distinguished by their compatibility with Insta360's original lens covers and thermal grip covers. Their additional advantage is excellent heat dissipation, which ensures optimal camera performance.

Full functionality and protection

Thanks to a clever design with special cut-outs, the covers do not obstruct the microphone, speaker or battery space, allowing you to freely use all camera functions. In addition, the open underside allows seamless mounting of additional accessories such as tripods and selfie sticks, increasing versatility of use. You can also use the device's buttons without interference.

Comfort and safety

The non-slip surface guarantees a secure and comfortable grip, while the materials used for the housing and lens cover ensure long-lasting durability and protection. This is ideal for any Insta360 X4 user who values both functionality and protection of their equipment.
