LaserPecker Air Purifier Smoke Absorber

The LaserPecker Air Purifier is an advanced smoke absorber designed to work with laser engravers. With its modern design, robust construction and advanced filters, the device not only effectively purifies the air of smoke and dust, but also makes a stylish addition to any workshop or office. Its precise technical parameters and quiet operation make it an ideal choice for professionals who value quality and efficiency.

Efficient filtration system

LaserPecker Air Purifier is equipped with an advanced filter system that effectively removes smoke particles, dust and other air pollutants. The filter set provides long-lasting effectiveness, working for 3 to 6 months (depending on the intensity of use). The large surface area allows for precise absorption of pollutants, resulting in cleaner air in the workplace.

Quiet and efficient operation

Thanks to the advanced design of the fan, the LaserPecker absorber operates at a noise level of 50-67 dB, which allows you to use the device comfortably without disturbing your surroundings.

Compact and robust design

The LaserPecker Air Purifier is compact yet sturdy, making it easy to set up even in small workspaces. With its modern design and simple interface, the device fits perfectly into the aesthetics of modern workshops.
