Genki Shadow Cast 2 Pro external video card

Genki Shadow Cast 2 Pro external video card

The Genki ShadowCast 2 Pro is an advanced external video card designed to professionally capture and stream gameplay in 4K quality at 60 frames per second (fps). The device also offers HDMI passthrough functionality for simultaneous display on a monitor or TV without lag, which is crucial during dynamic gameplay.

4K60 capture and seamless workflow

ShadowCast 2 Pro stands out for its ability to capture full 4K resolution video at 60 fps, a rarity among capture cards. With support for variable refresh rate (VRR) and the ability to capture video at up to 240 Hz at 1080p resolution, the card ensures smooth and jam-free video transmission, which is essential for professional live broadcasts.

Uncompromised image quality

The ShadowCast 2 Pro supports HDR10 mode, allowing it to capture vivid colors and wide dynamic range, rendering the game in the quality in which it was designed. This enhances the quality of both recorded footage and live broadcasts, offering viewers a more realistic experience.

Versatility and ease of use

The device is compatible with the latest gaming consoles, including PlayStation, Xbox, as well as computers equipped with USB-C 3.0+ and USB-A ports with the appropriate adapter. The ShadowCast 2 Pro works in Plug & Play mode, which means it requires no installation of additional drivers, and is intuitive to use. It is compatible with popular streaming applications such as OBS, Streamlabs, and Twitch Studio, allowing easy integration with existing broadcast management tools.

HDMI Passthrough function

ShadowCast 2 Pro offers an HDMI passthrough function, which allows users to connect an additional screen without introducing latency. This allows gamers to enjoy smooth gameplay on a monitor or TV while capturing video for streaming or recording. This feature is especially useful during intense gaming sessions, where every millisecond can make a difference.

Additional features and compact design

The card is also equipped with 3.5mm audio ports for dynamic audio mixing from different sources, which is important when broadcasting with live commentary. The Genki ShadowCast 2 Pro features compact dimensions (130 x 100 x 22 mm) and weighs just 182 grams, making it easy to carry and not take up much space on your desk.

Included

ShadowCast 2 Pro x 1
USB-C 3.2 cable x
HDMI 2.0 cable x 1

Manufacturer: GENKI
Model: IHTGSC2-PRO-EU
Dimensions: 130 x 100 x 22 mm
Supported HDMI resolutions: 4K/60fps, 1080p/60fps
USB output Resolution: 4K/60fps, 1080p/240fps; Color depth: 9/10/12-bit deep color, HDR10 for 1080p
Connectors: HDMI 2.0 Passthrough: Yes; USB: USB 3.2 Gen 1, UVC Video and USB Audio (UAC L-PCM format); Additional Ports: 2 x 3.5mm jack for audio mixing
