DJI Mic Basic wireless audio transmission system

Record excellent quality audio in almost any situation. The DJI Mic Wireless Audio Transmission System will give you crystal clear, natural sound and high immunity to interference. It guarantees wireless transmission up to 250m and offers a long operating time. The product is also distinguished by its wide compatibility and lightweight, portable design. The kit includes a transmitter and a receiver.

High quality sound

With the DJI Mic you can professionally record sound and enjoy almost unlimited freedom in the post-production process. The device brilliantly reproduces tones over a wide range of frequencies and excels in high fidelity reproduction. Forget about unpleasant rasps and artificial, unnatural sound!

Reliable wireless connection

Now you can record without interruption even in extremely complex scenarios. DJI Mic Basic lets you enjoy a high-speed wireless connection with a range of up to 250m. The latest coding technology is responsible for its reliability. You also don't have to worry about

delays or interference. The improved transmission system and 2.4GHz bandwidth guarantee stable transmission even in places like an office, train station or shopping mall. Free yourself from cables and gain almost unlimited freedom!

Record for as long as you need

The DJI Mic Basic will let you work as long as you need. The included receiver will last you up to 5 hours on a single charge, and the transmitter for about 5.5 hours. Want to check the charge level of your devices? Just take a peek at the receiver's touchscreen, which also lets you conveniently change the channel, adjust settings and use various functions.

Wide compatibility

Do you use several devices with different ports on a daily basis? No problem DJI Mic Basic will fit them! The included receiver is equipped with USB-C, Lightning and TRS 3.5mm interfaces, which means it is compatible with most popular camera, smartphone or laptop models. The device is also extremely easy to install. Using a hot shoe adapter, you can easily attach it to a digital SLR (DSLR) camera, mirrorless camera or phone mount.

Enjoy the freedom

Free your hands and get more freedom while recording. The transmitter is equipped with a special clip, with which you can conveniently attach it to your shirt or coat, for example. The set also includes a magnetic holder, which also allows you to attach the device to your clothes. At the same time, the transmitter is extremely lightweight. Weighing only about 30g, don't worry about it being an excessive burden!

Reliable performance

DJI Mic Basic will stand up to any challenge you put before it. It will not let you down in any conditions. The included wind shield will allow you to get clear sound even in noisy environments or outdoors, and the multi-level gain adjustment from -12dB to 12dB allows you to find the optimal settings in almost any situation. Also noteworthy is the Safety Track function. To give you peace of mind that you won't lose your footage in the event of any problems, the DJI Mic records an additional -6 dB track as a backup.
