Superfire GT-R1 Bike Flashlight

Take care of your safety. Bike flashlight Superfire GT-R1 will provide you with optimal lighting while riding after dark, it will make you perfectly visible on the road and will avoid accidental bumping into hidden in the dark glass or other objects. The device offers 3 light modes and is made of solid aluminum alloy. Durable battery guarantees operating time up to 7.5h.

Light your way

The flashlight has been equipped with a practical armband, with which you can easily attach it to the handlebars of your bike. The device generates light with a maximum brightness of 200lm and a range of up to 90m. It was designed in such a way as to effectively reduce glare. You can also choose from 3 light modes - High, Low and Strobe. This allows you to better adapt it to your needs and ensure optimal lighting during your bike trip.

Long runtime

Going on a long bike trip? You don't have to worry that the flashlight will refuse to work when you least expect it. The device is equipped with a durable battery with a capacity of 1800mAh, thanks to which its working time is about 3.5-7.5 hours on a single charge. To charge it, simply connect it to a power source using a micro USB cable. After about 5 hours, it will be fully ready to serve you again!
