

Choetech 10W inductive wireless charger with stand (black)

Ref: 6971824979022

Choetech 10W inductive wireless charger with stand (black)

Choetech wireless induction charger with Fast Wireless Charging stand

Enjoy even more convenient wireless charging of your devices. Choetech's Qi inductive charger provides up to 15W of power and features wide compatibility. It guarantees safe use and is highly durable. It is also equipped with a practical stand so you can use your smartphone while charging.

Fast charging - wide compatibility

You no longer have to wait too long for your devices to be ready to use. The Choetech charger supports fast wireless charging with 15W / 10W / 7.5W / 5W power. This allows it to charge up to 80% of the Samsung Galaxy S10 in about 2 hours and 36 minutes, and the iPhone X in about 3 hours and 22 minutes. The product is compatible with many smartphones from popular brands such as Apple, LG and Sony, for example.

Position your phone vertically or horizontally

The charger is equipped with 2 induction coils, so it offers a larger charging area. So you can place your smartphone on it horizontally or vertically to, for example, comfortably watch TV series, reply to messages, take notes, chat with friends and use the Face ID function. What's more, the built-in stand with silicone pads gives your device more stability and protects it from scratches.

Safe to use

Don't be afraid of damaging the charger or the equipment placed on it. The product has received Qi certification, which means that it allows not only efficient, but also safe charging. It has also been equipped with a smart chip that provides reliable protection against overheating, short circuit, overcurrent and overvoltage.

Improved design

The charger is made of high-quality materials, making it extremely durable and great looking. It also has a built-in green light indicator that will let you know the status of its operation. What's more, you don't have to take your phone out of the case to charge it using it. The product easily works with cases made of rubber or TPU plastic, whose thickness does not exceed 4-5mm.
