Wireless headphone with microphone New Bee M50 (black and gold)

Wireless headphone with microphone New Bee M50 (black and gold)

The New Bee Bluetooth headphone is an ideal solution for people who need a reliable and convenient device for talking and listening to music. It is ideal for drivers, office workers or engineers. Thanks to Bluetooth 5.2 technology, it provides a fast and stable connection to up to 2 devices simultaneously. Extremely lightweight construction and ergonomic design make using the handset comfortable even throughout the day.

ENC + CVC 8.0 technology for clear sound

The New Bee handset is equipped with an advanced noise cancellation system that uses ENC + CVC 8.0 technology. The main microphone accurately captures your voice, so every phone call will be clear and noise-free. In addition, the second microphone responsible for noise cancellation eliminates any background noise, allowing you to talk comfortably even in noisy places such as the office or car.

Long operating time - up to 24 hours of talk time

The New Bee M50 uses a long-lasting battery, which translates into 24 h of talk time or 20 h of music playback on a single charge. This is ideal for people who often make long phone calls or like to listen to music while working or traveling. What's more, the handset stays in standby mode for up to 60 days, so you don't have to worry about frequent charging. On the other hand, it takes about 2-3 h to fully

charge the handset.

Comfort and fit

New Bee was designed with comfort in mind. Its compact and lightweight design makes it almost imperceptible, and thanks to its special semi-open design, it fits perfectly to the shape of your ear without causing discomfort even after hours of use. What's more, you can adjust its position from 270° to 180°, allowing you to wear it on both left and right ears.

Easy to use

The New Bee handset offers easy and intuitive operation thanks to the buttons on it. Adjusting the volume, muting the microphone or answering and ending calls - all of this is accessible via a few convenient buttons. In addition, an LED indicator shows the current status of the Bluetooth connection and the charge level.
