Power Bank Mcdodo MC-0231 Digital Dis 10000mAh, 33W (czarny)

Ref: 6921002602310

Mcdodo MC-0231 Digital Display 10,000 mAh 33W Powerbank (black).

The Mcdodo MC-0231 offers fast and secure charging for your devices. With built-in USB-C and Lightning cables, the powerbank is compatible with both iOS and Android devices, offering versatile use without the need to carry extra cables. The compact design makes it ideal for everyday use, while offering top performance, even for devices like MacBook in emergency situations. You can also use it on board an airplane.

Charging performance and compatibility

The powerbank offers a full 33W of charging power, allowing you to quickly power devices such as the iPhone 15, which can be charged to 60% in just 30 minutes. Support for fast charging in PD 3.0, QC 3.0 standards, as well as Samsung SFC and Huawei SCP charging protocols, ensures fast and efficient charging of both smartphones and tablets such as the iPad and Galaxy Tab. Built-in cables provide convenience, allowing you to charge almost any device without the need for additional accessories.

Fast charging

The device is capable of charging an iPhone 15 almost twice, a Samsung S23 up to 1.5 times, and a Huawei P40 up to 1.6 times. Meanwhile, the powerbank itself will take about 1.5 hours to charge, so it will almost always be ready to go. The built-in digital display provides real-time information about the charge level, allowing you to accurately monitor the battery's status.

Security and reliability

The powerbank is equipped with a number of advanced safety features, including protection against overcharging, overheating, overvoltage, overcurrent and overload. These features guarantee safe charging, protecting both the powerbank and the devices connected to it. Additional short-circuit and electromagnetic field protections enhance the safety and reliability of the device's operation.
