Power Bank Mcdodo MC-3911 Digital Display 30000mAh, 22.5W do D (czarny)

Powerbank Mcdodo MC-3911 Digital Display 30000mAh, 22.5W PD (black).

The 30,000mAh powerbank is the ideal solution for users in need of a reliable power source. It offers support for a wide range of fast charging protocols, enabling fast and safe charging of a variety of devices. With up to 22.5W output power and 20W PD for iPhones, it provides four times faster charging compared to traditional powerbanks. In addition, the digital LED display and multi-level protection make it a reliable device ideal for long trips.

Fast charging of 22.5 watts

The powerbank provides support for fast charging technology with a power output of up to 22.5 watts, which allows you to replenish various devices extremely quickly. Thanks to the high power output, you can charge your smartphone, tablet, or other compatible devices in a short period of time. Support for such fast charging protocols as PD, QC, SCP, FCP, AFC, and VOOC enables fast and efficient charging. In addition, with 20W PD support for iPhone 8-14, you will renew your device's energy up to 60% in just 30 minutes.

30,000 mAh capacity

The powerbank's capacity of as much as 30,000 mAh allows you to charge various smartphones multiple times without the need to connect to a power source. For example, the powerbank can charge an iPhone 14 about 5 times, and a Huawei P40 and Xiaomi 13 about 4.5 times. Combined with fast charging, the powerbank provides maximum convenience.

Multi-level protection

The device features an advanced protection system that ensures safety for both the powerbank itself and connected devices. Protection includes safeguards against overcharging, over-discharge, overheating, etc. In addition, NTC sensors monitor the temperature of the system in real time, allowing you to adjust the operating parameters depending on the conditions. Thus, you can be sure that devices connected to the powerbank will be charged without risk of damage.
