

Thermostatic Head Model N EQIVA EQ-3 132231

Ref: 4047976322329

Thermostatic Head Model N EQIVA EQ-3 132231

Thermostatic head Model N EQIVA EQ-3 132231

EQIVA EQ-3 132231 is an advanced thermostatic head that combines modern technology with convenience. Designed for maximum efficiency and comfort, it allows you to precisely control the temperature in your home while taking care of energy savings. Whether you want to precisely adjust the heating to your lifestyle or protect the system from freezing, the EQIVA EQ-3 will meet all these requirements, providing heat where you need it.

Quick and hassle-free installation

Forget about complicated installations! The EQIVA EQ-3 head is extremely easy to install - no draining of the system or specialized tools required. It takes just a few moments to install it on your radiator, and thanks to the factory settings, you can start using it right away.

Precise settings and personalization

Adjust the temperature to suit your needs! The intuitive dial allows you to set the temperature precisely to within 0.5°C. You can set up to 3 heating phases for each day of the week, perfectly matching your heating schedule to your lifestyle. Whether you work remotely or come home in the evening - the perfect temperature is always waiting for you.

Features that take care of your comfort

The EQIVA EQ-3 thermostatic head is equipped with a number of practical functions that make your home more comfortable. The frost protection function automatically prevents the temperature from falling below 5°C, and with the Boost function you will quickly raise the temperature in the room. In addition, automatic temperature reduction during ventilation will help you save energy when you open the windows.

Child protection and energy savings

The appliance has a parental lock to prevent children from accidentally adjusting the settings. This gives you peace of mind that the programmed temperatures will remain unchanged. In addition, a built-in valve protection function ensures that the head regularly opens and closes the valves, which prevents them from fouling and extends the life of the heating system.

Manufacturer: EQ-3
Power supply: 2x 1.5 V LR6/Mignon/AA
Current consumption: Max. 100 mA
Battery life: Up to 3 years (with 3 heating cycles per day)
Display: LCD
Degree of protection: IP20
Thread: M30 x 1.5 mm
Dimensions: 55 x 60 x 102 mm
Weight: 160 g (with batteries)

Price:

€ 35.50
