

## Diagnostic Scanner OBD2 Ancel AD310/AC103

Diagnostic Scanner OBD2 Ancel AD310/AC103

Ref: 5906168439117

Ancel AD310/AC103 OBD2 diagnostic scanner

The Ancel AD310/AC103 scanner is an advanced diagnostic tool that allows you to quickly and efficiently identify technical problems in your vehicles. It is ideal for drivers who want to monitor the technical condition of their car on their own, as well as for professionals looking for reliable equipment for everyday work.

Extensive diagnostic capabilities

The AD310/AC103 offers a wide range of functions, including reading and clearing engine fault codes, displaying live data, and I/M readiness test, which verifies that the car is ready for emission inspection. The Freeze Frame function allows you to capture and analyze data from the vehicle at the time of an error, which is crucial for quick diagnosis and troubleshooting.

Fast diagnostics without the need for the Internet

The Ancel AD310/AC103 scanner enables fast and accurate diagnosis without the need for the Internet. It shows fault codes with definitions directly on the screen, eliminating the need to search for additional information on the web, saving time and facilitating quick repair decisions.

Simple and intuitive interface

The Ancel AD310/AC103 is designed for maximum ease of use. It features a large, easy-to-read LCD display that shows all necessary diagnostic information in an accessible manner. Ergonomic buttons and intuitive menus make the device easy to use even for those without advanced mechanical knowledge.

#### Compatibility and mobility

The device is compatible with most vehicles since 1996 in the US, since 2000 in Europe and since 2005 in Asia, supporting all vehicles with OBD II and CAN systems. Its compact design makes it easy to carry and use in a variety of locations, from a home garage to a professional workshop.
