

Deerma fragrance diffuser DEM-PX310W

Deerma fragrance diffuser DEM-PX310W

Ref: 6955578044588

Deerma DEM-PX310W fragrance diffuser.

The Deerma DEM-PX310W acts as a fragrance diffuser, air humidifier and ambient lamp with flame projection effect, creating a unique atmosphere in any room. So you can enjoy proper humidification of the air and the scent of your favorite aromas, while bringing a cozy atmosphere to your home.

Effective humidification and quiet operation

The built-in atomizer uses high-frequency ultrasonic technology, which effectively disperses a fine water mist with an efficiency of 11 ml/h, humidifying the air and eliminating dryness. The 300 ml water tank allows the device to operate for a long time without the need for frequent refilling. The noise generated by the diffuser is only 30 dB - so you can also use it at night without worrying about disturbing your sleep.

Benefits of aromatherapy

The ability to add essential oils to the diffuser is another advantage of the Deerma DEM-PX310W. The solution used allows you to delight in your favorite scents, which will spread throughout the room along with a gentle water mist. Aromatherapy provides many health and well-being benefits, including stress reduction, improved sleep quality and overall mood.

Eye-pleasing lighting

Relax with the flame simulation feature, which is available in two colors - blue and yellow. Each color offers three brightness modes (100%, 50% and flashing), allowing you to adjust the lighting effect to suit any occasion. The blue light introduces a calm and elegant atmosphere, ideal for relaxation, while the yellow light creates a warm and sociable environment. With six different lighting settings, you will create the right mood for any occasion.

Intuitive operation and convenient charging

A clear mode indicator and USB-C charging interface ensure convenient use and fast charging of your device. The stylish design with an extended mist outlet guarantees effective operation, and the compact dimensions of 230 x 100 x 115 mm make the diffuser great for small spaces as well.

Practical solutions

The Deerma DEM-PX310W fragrance diffuser is equipped with a three-stage timer, which allows you to set an automatic shut-off after 2, 4 or 6 hours of operation. The function used allows you to safely use the device even at night, ensuring a peaceful sleep without having to worry about turning it off. In addition, the automatic shutdown when the water tank is emptied increases the safety of use.
