

Gosund SP6 16A USB-C 20W Tuya smart WiFi/Bluetooth socket

Ref: 6977038680389

Gosund SP6 16A USB-C 20W Tuya smart WiFi/Bluetooth socket

Gosund SP6 16A USB-C 20W Tuya smart WiFi/Bluetooth outlet

The Gosund SP6 smart outlet is the ideal solution for managing devices in the home, offering full control over energy consumption and fast charging with an integrated 20W USB-C port. Equipped with remote control, energy monitoring and voice assistant support, it provides convenience and energy savings for daily use. With its compact design and ease of use, this outlet will fit perfectly into any modern interior.

Fast charging and convenient control

The Gosund SP6 has two USB ports with PD 20W fast charging technology, allowing you to quickly renew the energy of devices such as smartphones, tablets, wireless headphones, etc. With a dedicated mobile app, you can remotely manage the outlet, monitor power consumption in real time, and set operating schedules to save power and make optimal use of your devices.

Remote control and integration with voice assistants

The Gosund SP6 outlet connects via Wi-Fi and Bluetooth, allowing remote control from anywhere using an app on your phone. It also supports voice assistants such as Hey Google and Alexa, allowing you to control devices with simple voice commands. You can turn on the coffeemaker, lamp or other appliances without touching a switch - all you need is your voice and the right command.

Compact design and ease of use

The Gosund SP6 socket is distinguished by its compact dimensions (80.91 mm x 67 mm x 54 mm x 19.05 mm) and modern design, so it will fit perfectly into any interior. Its discreet appearance does not disturb the aesthetics of the room, while providing full functionality. The socket supports a current of 16A, which makes it suitable for powering even more demanding devices. In addition, the device is fireproof, which protects equipment from short-circuiting, overheating, etc.

Functionality for the whole family

Thanks to a mobile app, the Gosund SP6 smart outlet can be controlled by multiple users simultaneously. The whole family can gain access to manage the outlet, making it easy to control and customize settings for each household member.
