Ref: 6974363711559

iPega PG-9083s wireless controller / GamePad with phone holder

iPega PG-9083s gaming controller

Take your gameplay to the next level and break new records. The iPega gaming controller is compatible with Android and iOS, and with an adjustable width of up to 280mm, it can handle a wide variety of devices - including smartphones and tablets. Bluetooth 5.0 guarantees a stable and fast connection. It is also possible to connect the device with a cable, so you can also play comfortably on a PC or PS3. The long-lasting battery provides up to 15 hours of use of the PG-9083s, and the ergonomic design means that you can enjoy prolonged gameplay without getting tired.

2 connectivity options

You can connect the controller in 2 ways - wirelessly or with a cable. Bluetooth 5.0 connectivity will let you forget about any signal transmission problems. PG-9083s provides a fast, stable and reliable connection - unexpected delays or stuttering will never stand in your way of victory again! You can also connect the device wired - for example, to a computer or console.

Perfectly thought-out design

The controller is distinguished by its sliding design, thanks to which you can adjust its width. This means that you can easily place a smartphone or tablet with dimensions of 13-28 cm on it. The devices can be mounted both horizontally and vertically - it's up to you to decide how it will be more comfortable for you. The slider located on the back of the controller allows you to lock the set width,

guaranteeing the required stability.

Wide compatibility

Play on your favorite hardware without any obstacles. PG-9083s is compatible not only with phones and tablets running Android 6.0+ or iOS 11.0-13.3.1+. This gives you almost unlimited possibilities. No matter what you like to play on - iPega will help you win!

Ergonomic design

Play for hours without fear of wrist pain or fatigue. The controller is designed to provide you with maximum comfort. Made of durable, yet pleasant to the touch materials - it fits perfectly in your hands and will not slip out of them. Placed in easily accessible places, the buttons make gameplay even more enjoyable - your next record is closer than you think!

Long working time - convenient charging

Forget about unexpected, unwanted interruptions in the game. The controller is equipped with a long-lasting 380 mAh battery, which provides a working time of up to 15 hours. You charge it with the included microUSB cable. You can also use the controller while it's charging - so you don't even have to interrupt gameplay!
