

Deerma handheld vacuum cleaner DEM-CM980W

Deerma handheld vacuum cleaner DEM-CM980W

Ref: 6955578044427

Deerma DEM-CM980W handheld vacuum cleaner.

The Deerma DEM-CM980W handheld vacuum cleaner uses a 4-stage cleaning system, enabling effective removal of dust mites and dust. The device is equipped with dual 0.6-liter containers and provides continuous suction power of $\geq 13\text{kPa}$. Now you will comprehensively clean textile surfaces, enjoying a high standard of hygiene and comfort.

Five-stage cyclone filtration system

The advanced five-stage cyclone filtration system provides deep air cleaning. As a result, the device effectively filters dust and harmful substances layer by layer. Honeycomb filters trap larger particles, and a dense cotton filter eliminates unpleasant odors for fresh, clean air. Take care of your respiratory tract and forget about secondary pollutants!

Reliable for everyday use

The device offers four cleaning stages. UV-C illumination eliminates dust mites and bacteria, 60°C heating reduces their activity, high vibration (12,600 strokes per minute) effectively removes contaminants, and suction power of up to 13 kPa immediately draws in dust and mites. As a result, the device provides satisfactory results, while generating relatively low noise, not exceeding 80 dB.

Intuitive and convenient operation

Thanks to its compact, ergonomic design (268 x 212 x 286 mm) and low weight, you can comfortably carry and maneuver the device. A button on the handle allows you to quickly start cleaning with a single movement. The balanced center of gravity makes the vacuum cleaner sit perfectly on your mattress.

UV-C technology

The UV-C lamp effectively destroys bacteria and dust mites, ensuring a high standard of cleanliness. The device uses a safety sensor that automatically turns off the UV light when there is no contact with the surface to be cleaned. The function used protects skin and users from harmful UV radiation, increasing safety during use.

Modern dust container system

The left container is responsible for separating dust and dust mites, so the filter is protected from clogging, which in turn ensures uninterrupted suction power. The right container filters the air, effectively removing fine particles and preventing secondary contamination. The transparent design makes it easy to monitor the contents of the containers, making it more convenient to use and allowing you to monitor the cleaning efficiency in real time.

Thoughtful design details

Every component of the Deerma DEM-CM980W vacuum cleaner has been carefully designed. The mechanical handle was made with comfort and energy savings in mind, and the smooth-rolling rollers ensure that the device moves easily and effortlessly over surfaces. With Deerma, comprehensive cleaning requires no shipping!

Included:

Deerma DEM-CM980W handheld vacuum cleaner. User manual

Manufacturer: Deerma
Model: DEM-CM980W
Capacity of dust container: 0,6 l
Rated voltage: 220V-240V~
Rated frequency: 50Hz-60Hz
Rated power: 450 W
Noise level: 80 dB (A)
Suction power: ≥ 13 kPa
Product dimensions: 268 x 212 x 286 mm

Price:

€ 71.00
