

Dash Cam Carlinkit Tbox Plus AR (4+64G)

Ref: 6972185560041

Dash Cam Carlinkit Tbox Plus AR (4+64G)

Carlinkit Tbox Plus AR (4+64G) Camera.

Carlinkit Tbox Plus AR (4+64G) is an advanced car camera that combines driving recording functions with multimedia capabilities. Equipped with Android 12.0 and a powerful Qualcomm QCM6125 Octa-core processor - it provides smooth operation and high performance, making it an ideal choice for demanding users. The device also has a built-in GPS module, which will allow you to conveniently track your routes and make it easier to find your way to your destination.

Performance and Memory

With 4GB of LPDDR4 RAM and 64GB of UFS Flash storage, the Carlinkit Tbox Plus AR can run multiple applications simultaneously, ensuring fast and seamless performance. The Adreno 610 GPU guarantees high-quality graphics, which is especially important when viewing videos.

Image Quality

The camera is equipped with a 1/2.7-inch CMOS sensor and a wide-angle lens with an aperture of f1.6, enabling 1080p recording at 30 FPS. With a wide 148° viewing angle, you can really fit a lot into the frame, which increases safety on the road.

Safety features

The Carlinkit Tbox Plus AR offers an automatic accident detection function, which in the event of a sudden shock or collision automatically protects the current recording so that it is not overwritten. In addition, the loop recording function allows you to continuously record your driving without worrying about filling up the memory card.

Ease of installation and use

Installation of the camera is very simple - just plug it into the car's original CarPlay USB port. What's more, the product is compatible with TF and SIM cards. Built-in Wi-Fi supporting 2.4G and 5G frequencies provides a high-speed Internet connection for easy data transfer and use of apps such as YouTube, Netflix and Google Play.

LoadKey app

The camera also offers a dedicated LoadKey app, which significantly expands its functionality. It allows you to conveniently manage recordings, download HD video in real time, and customize settings.

Compatibility and additional features

The camera is compatible with iPhones 6 and above, as well as smartphones running a minimum of Android 11.0, and allows the installation of additional apps from the Play Store, such as Netflix, TikTok, YouTube and Instagram, for example. Thus, it can provide an additional source of entertainment while traveling!
