

## Workshop lamp with solar panel Superfire GM05

Workshop lamp with solar panel Superfire GM05

Ref: 6975515774347

Superfire GM05 solar panel workshop lamp.

The Superfire GM05 workshop lamp is a reliable source of light in any workshop, garage and beyond. It offers several operating modes, and with a brightness level of 500 lm, it provides strong and bright illumination, ideal for precision work and illuminating large spaces. With a 360-degree swivel handle and strong magnets, the lamp can be easily fixed in any position.

Ideal for a variety of applications

The Superfire GM05 workshop lamp is a versatile tool that can be used in any situation, whether you're at home, at work or out in nature. It will be perfect for repairs in the workshop, offering the bright illumination needed for demanding tasks. With its waterproof housing and sturdy construction, it is the perfect companion for camping, outdoor expeditions or night hikes.

High performance and a variety of lighting modes

Equipped with 500 lumens of LEDs, the Superfire GM05 lamp offers four different lighting modes: Glare, Middle, Low Light, SOS. This allows you to adjust the intensity of the light at 4 levels to suit your current needs - from illuminating large spaces to a soft light in camping conditions. With the function of changing the color of the light between warm yellow, warm white and cold white, you can easily create the right mood and comfort for your work.

#### Various charging methods

Superfire GM05 provides convenient and versatile charging options, perfect for any situation. Equipped with a solar panel, it allows you to charge quickly with solar energy, which is great for camping or outdoor adventures. In addition, thanks to the USB-C port, the lamp can be easily charged from any power source, such as a laptop or powerbank. The 18650 batteries, with a capacity of 2600 mAh each, provide long-lasting performance, and the charge indicator lets you know your battery status, so you always know when it's time to recharge.

#### Built for your convenience

The Superfire GM05 light is designed for maximum functionality and convenience. The swivel handle, which rotates 360 degrees, allows you to precisely adjust the direction of the light where you need it most. This makes it easy to mount it in any position for optimal illumination of any space. The lamp is also equipped with strong magnets that allow it to be firmly attached to metal surfaces, which is extremely useful in the workshop or garage. What's more, the GM05 also acts as a powerbank, allowing you to charge your devices in emergency situations.
