Neakasa M1 intelligent self-cleaning cat litter box

The Neakasa M1 is a smart, self-cleaning cat litter box that keeps your cat clean and hygienic while minimizing your involvement in daily litter box maintenance. Thanks to its open design and advanced litter screening technology, the device automatically separates waste from clean litter, ensuring your cat always has a fresh and comfortable toilet. In addition, the litter box is equipped with the Neakasa app, which allows you to monitor the level of litter, the amount of waste and your cat's activity, providing comprehensive care for your cat's health.

Automatic cleaning and convenience

The Neakasa M1 is designed so that you never have to manually clean the litter box again. The unit's advanced litter screening technology automatically separates debris from clean litter after every cat visit, making it always ready for use. The spacious 4-liter waste container allows for two weeks of use without emptying, ensuring cleanliness and hygiene in your home.

Advanced odor control system

The Neakasa M1 litter box is equipped with sealed, moisture-proof trays filled with a high-quality gel filter that effectively neutralizes odors. The waste bag tightly seals the waste, which prevents the spread of unpleasant aromas. Replacing the bag is extremely easy - just replace it with a new, ordinary garbage bag.

Open design for cat comfort

The unique open design of the Neakasa M1 litter box provides your cat with comfortable entry and exit, while eliminating the risk of getting stuck during automatic cleaning. This allows your pet to use the litter box freely, and gives you peace of mind that it is safe. The litter box provides a smooth and natural transition for your cat, making it easy to adapt to a new environment - most cats get used to it within a week.

Four intelligent modes

The Neakasa M1 offers four modes of operation: automatic, manual, timer and emptying mode. This way you can customize the operation of the litter box to suit your needs with the touch of a button or the Neakasa app. All modes allow you to effectively maintain cleanliness, without the need for your direct involvement.

Monitoring your cat's health and activity

Advanced weight sensors and a cat recognition function automatically monitor your pet's visits to the litter box. The Neakasa app provides up-to-date information on activity, weight and frequency of toilet use, allowing you to monitor your cat's health in real time.
