

Petoneer Fresco Mini Pro pet fountain / drinker

Petoneer Fresco Mini Pro pet fountain / drinker

Ref: 6930460007360

Petoneer Fresco Mini Pro Fountain/Pet Drinker.

Give your pet constant access to fresh, filtered and safe water with the Petoneer Fresco Mini Pro fountain. It's not just a waterer - it's an advanced system that will take care of your pet's health by offering sterilization, filtration and water pumping in one device. The naturally bubbling water attracts the attention of cats and dogs, encouraging them to drink more often, which effectively helps prevent urinary tract diseases. With this fountain, your pet will always have access to clean and healthy water.

Advanced filtration system - clean and healthy water

Petoneer Fresco Mini Pro is equipped with a unique filtration system that guarantees the highest quality water. The multi-layered microporous filter effectively removes fine hair and impurities. Activated carbon from coconut shells eliminates residual chlorine and unpleasant odors, and ion exchange resin softens water by removing calcium and magnesium ions. A KDF filter reduces the proliferation of heavy metals and microorganisms, and quartz sand minimizes the risk of intestinal and stomach diseases in animals. The water is also enriched with a mineralized bead, which gives it a pleasant, sweet taste. It is recommended to change the filter every month to ensure constant freshness of the water.

Effective UVC sterilization - 99% safety proven.

The Petoneer Fresco Mini Pro fountain uses built-in UV light with a wavelength of 270 nm, which eliminates up to 99% of bacteria,

parasites and other pathogens in 60 minutes of operation every 4 hours. UVC technology destroys the DNA structure of pathogens, guaranteeing water of the highest purity and safety for your pet.

Convenience and safety on a daily basis

The device operates on a safe 5V low-voltage power supply, protecting your pet from burns. The design is rust- and water-resistant, and features non-slip pads to prevent the drinker from sliding. In addition, the unit is inclined at a 7-degree angle, so your pet's whiskers won't come into contact with the water, providing even more comfort while drinking.

Remote control and full control

The Petoneer Fresco Mini Pro connects to your smartphone via Wi-Fi and Bluetooth, allowing you to remotely control the device via a dedicated app. It allows you to monitor water levels, check the status of the filter, personalize watering times and receive notifications when you need to change the filter or refill water. This is an extremely practical solution that will allow you to take care of your pet's comfort even from a distance. In addition, the drinker supports a USB interface, which opens up more possibilities.

Practicality and time saving

The fountain with a capacity of 1.9 liters provides access to water for an adult cat for up to a week. In the event of a power outage, the specially designed top lid will store up to 80 ml of water so that your pet is not left without hydration. Quiet operation of the device at a level comparable to a whisper allows you to use it even in the bedroom, without disturbing the sleep of household members.

Simple operation and stylish design

Petoneer Fresco Mini Pro is a device designed with convenience in mind - both for the pet and its owner. The design is easy to assemble and disassemble, and with a minimal number of buttons, operation is intuitive, even for those unfamiliar with technology. The soft LED light of the built-in indicator allows you to monitor the status of the drinker, water level, WiFi connection and filter status.
